TIME FOR A POLITICAL REVOLUTION

Alison is ready to continue the political revolution as California's next Senator.

She understands that the promise of California and the American dream should belong to everyone, not just the wealthy and well-connected.

People all across our state are rising up against corruption and the billionaires and politicians who take our votes and lives for granted. California is one of the most progressive, diverse states in the nation.

We deserve a new generation of leaders who understand the struggles of working people and reflect who we are today.

We can either be a democracy that's led by the people, or we continue selling our government to the highest bidder. But we can't do both.

In the wealthiest nation in the world, we should all have the things we need to thrive.

The political establishment have monopolized our wealth and power for long enough.

The American people are ready for a new movement to take on their corruption and greed. We can't expect change from establishment politicians like Dianne Feinstein who helped to create this corrupt system. I am part of a national movement to create a democracy that works for all of us.

Why Support Alison?

California Deserves a Working Class Leader.

Alison Hartson has spent her life in the service of others. She is dedicated to fighting for those in her community, ending corruption and taking on the political establishment.

For 10 years she served as a high school teacher in the working-class community of Garden Grove, CA. She saw up close how the corrosive influence of money in politics made two systems in this country: one for the rich, and one for the working class. After seeing inequality in action as a teacher she was inspired to take direct political action.

She joined WolfPac, a political action committee dedicated to passing a constitutional amendment to end corruption, as a volunteer. Alison's tireless dedication as a volunteer ultimately led to her being asked to serve National Director at WolfPac.

She has been at the helm for the last two years until stepping down after being asked once again asked to serve. This time by Justice Democrats and the role was the US Senate. She accepted and is now running to be California's next Senator.

When Alison fights she wins. Her leadership of more than 1,000 volunteers helped California become one of the first states to pass a resolution supporting a constitutional amendment ending money's corrupting influence on our political system.

Her leadership was also pivotal in passing similar resolutions in two other states. has proven time and again to be both capable and trustworthy.

At this difficult moment for our nation, she is stepping up to provide a courageous voice for the working people of California.

Democracy is powered by volunteers like yourself.

WE NEED YOU. HOW WILL YOU HELP?

WHAT WE CAN ACHIEVE TOGETHER

An End to Corruption

Super PACs should be banned, private donations to politicians and campaigns should be banned, and a clean public financing system should be implemented to end the takeover of our government by corporations and billionaires. Americans deserve free and fair elections—free from the corruption of big money donors. The Supreme Court has effectively legalized bribery. It's time for an Article 5 convention to take our Democracy back from the brink of Oligarchy. [Read More](#)

Medicare for All

The United States should catch up to every other modern nation and implement a single-payer, medicare-for-all system. There's no reason we can't be #1 in the world instead of #37. It's time to end the destruction of American healthcare by rapacious, price gouging, for-profit, private health insurance middlemen. [Read More](#)

Free Public Higher Education

In America, every child deserves a chance to succeed. A college education should be a right, not a privilege. Educating the citizenry of a nation pays dividends in the long run, with the economy getting back much more than is initially put in. Crushing student debt for higher education would no longer burden young men and women trying to improve their lives through hard work. We should strive to have the best education system in the world. [Read More](#)

A Just Justice System

It's time to end our for-profit criminal justice system by ending prison labor, private prisons and detention centers, cash bail systems, and all the other ways our criminal justice system profits off the vulnerable. [Read More](#)

Raise the Minimum Wage

This is about justice and basic human decency. If you work hard and you work full time you shouldn't live in poverty. Furthermore, we support strong unions and collective bargaining. [Read More](#)
